OCEAN

Oceancycle™

OceanCycle™ is a social enterprise focused on preventing ocean plastic pollution and improving livelihoods in coastal communities through certification and direct social interventions.

Through certification, OceanCycle™ partners have achieved:

926,000,000

Bottles diverted from the ocean

31,300,000

Kg of CO2 prevented

4,600,000

Income for coastal communities

The Ocean bags collection is OceanCycle™ certified.

Prevention is key

Over 80% of plastic in our oceans starts on land, and research shows that what does get in the water sinks to the bottom and is difficult to recover.

Most ocean plastic cannot be recycled

Plastic in the water gets degraded by salt and light and attracts toxins and micro-organisms. It also breaks into small pieces and mixes with other plastics making cleaning and sorting difficult and costly.

The problem is bad and getting worse

Over 11 million tons of new plastic enters the ocean each year, a figure that is projected to triple by 2040.

People are the answer

Plastic is collected by hand in the countries most at risk for ocean plastic pollution. Solving the problem requires understanding the needs of community collectors and providing them with the tools for success.

ECO DYED recycled polyester

Conventional mass dyeing processes (using synthetic dyes) require huge amounts of water and energy, resulting in waste and carbon emissions. Using eco-dyeing can result in a reduction of up to 87% in water consumption and an overall CO2 saving of 58% compared to mass dyeing, with significantly fewer chemicals released from the entire process.

-87% H₂O

in ECO DYED polyester production compared to virgin dyed polyester production.

-58% CO₂

in ECO DYED polyester production compared to virgin dyed polyester production.

ECO DYED recycled polyester

Eco dyeing involves adding pigment directly to the molten plastic solution before the fiber is made.

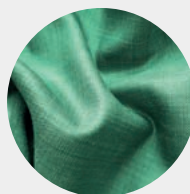

1. PET bottles

2. the bottles are washed and crushed

3. the fabric is dyed while being spun

4. R-PET eco dyed fabric

5. finished product

CUSTOMIZATION

Customization prices refer to the cost of printing only, one printing passage, one colour with the technique and or the required quantities, excluding fixed cost of film and eventual additional optional packaging costs. Prices exclude VAT

Printing Technique

Pad Printing
Silkscreen printing
Automatic Silkscreen printing
Sublimation
Laser printing
Digital
Drop of transparent resin with lenticular effect (doming)

For 2 or 3 colours printing on Non Woven ,PP , PL it will be necessary to verify the logo ,in order to check the suitability of printing on that specific material: the colours of the logo cannot be added one on the other or in touch each other. For some items, in particular dark-colored textiles and polyester- depending on the logo and for a successful printing - you may need a background in order to avoid color sublimation. In this case there will be price increase.
